

19 July 2009

The Glebe Apartments, Queenstown have been using Chrisal products for the last 8 months. We have found the cleaning products very effective and noticed a change in the air. The bathrooms had signs of bacteria growth in the shower grouting and this has now vanished. We were recently Qualmarked and one comment was the impressive hygiene standard. With the responsible Tourism "environmental status" Chrisal products are 100% safe to use, they are environment friendly, have no harmful properties for our staff.

Thank you Chrisal for helping us achieve our 5 star ranking.

My staff love the product and as a small reward for work well done I gave a Chrisal household pack as a gift for each of my staff so they can use it in their own homes.

Anne Henley
